*Alternate Nationalities

- A couple notes on nationality - an alternate nationality game might exist, but I'm not going to document it here I am only making separate listings for alternate nationalities see there is a great difference in rarity and value. For the difference in value between the English and Japanese versions preference.

All cartridges listed (excluding unreleased carts) are assumed to be in MINT condition. Also, they are all assumed to be complete as well as SNK-authentic. Depending on missing items prices vary. This list of home cartridges.

The first number is the lowest price you will find the cartridge selling for in the US. Any price less than this is a real steal! The second value is the highest reasonable price you can pay for the cartridge. Any more, and chances are you could find it cheaper somewhere else. The third column is a rarity list. It is meant to give a general idea of how often you find

C : common

U : uncommon

R : rare

ER : extra rare

EER : extremely extra rare, near impossible to find!

+ = price can escalate greater than the quoted high value

★ = questionable release by neogeofreak

★ = this game is thought to be Japanese only in release origin
